DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by
McDaniel U.S. Patent No. 6,676,655.

McDaniel discloses methods for treating skin disorders, the methods comprising the step of exposing the treatment area to a laser light generated by an Nd:YAG laser in the wavelength range of 1064 nm.

As to claims 4 and 5, he teaches treatment durations that are analogous to the recited treatment times.

As to claims 1, 8, and 9, his treatment dose is between approximately 0.1 –100 J/cm².

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. XX to Anderson discloses a method for treating skin disorders, such as acne by irradiating the treatment site with a laser light, wherein

Art Unit: 3739

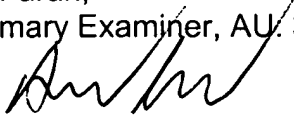

the treatment laser is selected from the group consisting of an Nd:YAG, Alexandrite, etc.
